## **Program Notes**

This was one of several songs my wife, Judy, and I wrote hoping to interest an American tenor in Germany to include in one of his recitals. The song is suitable also for a soprano. First performance March 2011 by Nathan Leaf (tenor) and Tom Koch (piano) at Southeastern Composers' League national conference at North Carolina State University at Raleigh.

I dreamed I saw the mountain,  
a looming tower in the distance,  
like an old and proud man  
smoking a frozen pipe in the frosty air.

I dreamed I heard the mountain as it  
bade me approach, kindly leading me  
through its child foothills, beckoning me to  
climb to its glistening, snow-capped summit.

I dreamed I felt the mountain when I  
touched its rocks bathed in vibrant oranges,  
reds and lavenders as I ascended on rugged  
stair steps to meet the man in the moon,  
his translucent face ever before me.

I dreamed I heard the sounds of children  
laughing, lovers whispering, music  
filling my soul with a delicate yet  
unforgettable magnificence as I reached  
the summit and evaporated into the sunset.
